## COMPANY OVERVIEW

Universal Biosensors (ASX:UBI) is a specialist medical diagnostics company developing, manufacturing and commercialising a range of diagnostic tests for consumers and professionals in the \$US15b growing point-of-care (POC) diagnostics market.

UBI's core technology is a disposable, multi-layer test strip, which uses patented electrochemical sensing technology to measure biomarkers in the blood.

## UBI SHARE PRICE

## POC DIAGNOSTICS

Point-of-care diagnostics systems must be accurate, easy-to-use and affordable.

Universal Biosensors' novel technology offers these attributes in a POC diagnostic system, and can be applied to a broad range of clinically and commercially relevant tests.

Universal Biosensors' technology can play a major role in driving POC testing that will revolutionise diagnostics.

# POWERFUL PLATFORM TECHNOLOGY

- Industry leading, strong IP
- Fast, lab accurate results at the point of care
- Small blood sample
- Simple electrode design for efficient, automated strip manufacturing
- Platform capability with multiple applications

# ESTABLISHED GLOBAL PARTNERSHIPS

# COMPELLING INVESTMENT CASE

- ✓ Participating in the large and growing Point of Care diagnostics (POCD) market
- ✓ Exploiting a unique, powerful and patented diagnostics platform
- ✓ Products developed with Johnson & Johnson and Siemens launched internationally
- ✓ Growing revenues based on the manufacture and sale of disposable test strips
- ✓ Significant upside through a portfolio of high value products in late-stage development
