Check the appropriate box to indicate the rule pursuant to which this form is being filed, and provide the period to which the information in this form applies:

- Rule 13p-1 under the Securities Exchange Act (17 CFR 240.13p-1) for the reporting period from January 1 to December 31, 2020

Section 1 - Conflict Minerals Disclosure

Item 1.01 Conflict Minerals Disclosure and Report

Conflict Minerals Disclosure

This report has been prepared by management of Universal Biosensors (the “Company,” “we,” “us,” and “our”) to comply with Rule 13p-1 (the “Rule”) under the Securities Exchange Act of 1934, as amended. The Rule requires companies whose manufactured products contain minerals originating in the Democratic Republic of the Congo and the adjoining countries (collectively the “Covered Countries”) to publicly disclose information related to such use. The minerals currently subject to SEC’s disclosure requirements are columbite-tantalite (coltan), cassiterite, wolframite and gold, and their derivatives, including tin, tantalum and tungsten (collectively, the “Conflict Minerals”).

Company Overview

Universal Biosensors are specialists in design and development of electrochemical cells used in conjunction with point-of-use devices that are used in various industries such as healthcare, food and drink and agriculture. The tests utilize a disposable test strip. The electrochemical cell in the test strip is designed to allow for greater accuracy while retaining other critical features including the ability to obtain results quickly using only a small sample of fluid. The process for manufacturing the test strips is designed to be economical and capitalizes on the use of commercially available materials.

For the year ending December 31, 2020, we determined that quantities of a Conflict Mineral, specifically gold is contained in our test strips. We seek to source components and materials from companies that share our values regarding respect for human rights, integrity and environmental responsibility.

Reasonable Country of Origin Inquiry

We obtain the gold we use in our test strips from a single supplier who provided us with information regarding its supply chain according to the standard Conflict Minerals Reporting Template designed by Electronic Industry Citizenship Coalition and the Global e-Sustainability Initiative. Upon careful review of the supplier’s responses, and all information that we have obtained regarding the supplier in the normal course of our business with the supplier, we determined that the gold used in our test strips did not originate in the Covered Countries.

Conflicts Minerals Disclosure

As required by Rule 13p-1, the Company is providing a copy of this Form SD on the Company’s website at <http://www.universalbiosensors.com/Investor-Centre/Corporate-Governance.aspx>. The information on this website is not incorporated by reference into this Form SD.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the duly authorized undersigned.
